African Brewing the craft developed from the cradle of brewing

By John D. Cluett

The book is an outstanding presentation of brewing in South Africa taking the reader through the history of this craft, starting over 3000 years back, and describing in great detail the brewers and brewsters, their brewing processes and equipment that are being used to produce many beers that are enjoyed by all of us in South Africa.

The exciting pairing of beers with food are described and accompanied with excellent photos.

As I know many of those people and breweries mentioned in this book, one can say that it reflects well on the passion of Lucy and Ryno who wrote it, and on all those that they have mentioned.

It also places South African craft brewing at the highest level of this exciting development in the international brewing industry that has been "my home" for over 5 decades.

a great informative read

By Errol

I loved this book. Being a rookie brewer I found this so informative and inspiring and comforting to know that if these brewers can do it. So can I. I look forward to visiting the breweries mentioned and having

interesting conversations with them about my new found passion.
