MedSurg Notes

By Kepndion

Love this little book! Info is organized by body system and common signs and symptoms. Great approach because it's just like a real clinical --- you walk in the client's room and assess their signs and symptoms and you have to act! This makes sure you remember everything. It tells you what to do first, what to assess, what to get ready to do, etc., depending on the signs and symptoms. Also includes how to do focused assessments for each body system, how to analyze ABGs, how to manage chest tubes, what type of isolation to use etc etc --- all the stuff you forget unless you do it all the time.

No help with clinicals

By Ashlee

The same company makes RN Notes and it is wayyyyyy better. I didn't find this guide helpful at all. It doesn't have a lot of necessary values needed for clinicals. The prescription section is a joke. For good basics, buy RN Notes.

By Robert S

This little pocket flip book is invaluable if you are a nursing student or new nurse, wealth of information very condensed and to the point. Each system is represented with landmarks etc.
