Inspired, value-packed "tiny" shelter resource

By Belle Struck

I received this book as an early birthday present from my daughter, Belle, a few days ago. My head and heart have been pouring over it for two days now and I love it!

I am a THOW (tiny house on wheels) designer/builder/dweller. I own several versions of Deek's books and all of them evidence his effluent creative spirit and inventive use of resources. Back in 2012, when I attended his workshop (and slept in the Gypsy Junker, page 142), there were only a few books on the market on tiny houses and/or plans.

This Renaissance man (father, builder, designer, musician, artist, boy scout leader, community founder) has authored several previous books that are chock full of his amazing drawings and unconventional dream shacks. This publication stands out as a wonderful collection of many micro-shelters around the country that he has filmed and includes some structures we have built in his workshops. Deek's writing style is charming and his observations succinct. A plethora of tiny shelters are presented with each of their customized storage innovations and construction materials in bold living color.

I highly recommend it as a first book to any tiny house enthusiast for all of its tips on tools, salvaging strategy, construction basics, micro shelter plans and affordable décor ideas. Whether you are planning to construct a backyard tree house, mini-studio, office or a year-round tiny home, this book needs to be in your hands, dog-eared, enjoyed, used, and cherished for years to come.

Those of us who live in tiny houses are very minimal in what stuff we keep. I have only 30 treasured books in my 184 square foot tiny house on wheels; and this is the third one from Deek! He inspired me three years ago to fulfill my Silver Bullet Tiny House challenge, and I passionately believe Deek's micro shelters book will inspire you too!

I love to learn about others who share my passion for ...

By JmoffettK

I received my pre-ordered copy of Micro Shelters yesterday. I have barely put it down since! As a Tiny House dweller, I love to learn about others who share my passion for diminutive abodes. This book has it all! The photos are amazing! The back story of each structure is fascinating, and Deek points out his own favorite features of every one. In addition to all this...are sections on tools, the beauty of using salvaged materials, and tips for the tiny budget. As if that was not enough, the final section is comprised of plans for six unique tiny structures...for those inclined to build their own, but needing a place to start. This book will appeal to lovers of "Tiny" at any/all stages of their journey...dreamers, builders, dwellers, as well as lovers of all creative design. Oh, and did I mention, for those not familiar with Deek's work, that the book exudes a humor, in both text and illustration, that had me laughing out loud well after midnight (by lantern light). I am so inspired...I'm heading out to do a little dumpster diving!

Fabulously Inspiring

By Amanda Kovattana

I have a collection of tiny house books which includes Deek's first book that I so loved because it was filled with such playfulness and imagination. This book with its full color pictures and eclectic sensibilities is so inspiring I could hardly sleep after reading it too close to bedtime. Still there are his comic book drawings of wacky shelter ideas, but the pictures of the actual building feats are so deliciously real that my mind enters another realm.

This latest book distinguishes itself with a broad scope of buildings from simple shacks to ones on trailers to tree houses to push carts. Not only is it a collection of notable like minded shelters across the country, but it includes many of Deek's own wonderful designs. Deek delights the eye with his sense of color and design. He even offers decorating advice. Coupled with his frugal salvage-collecting sensibilities every project embodies an eco ethic and available-materials driven direction that makes every build a unique work of art.

The handful of solution oriented plans at the end push the envelope as to what it is possible to live in in terms of real world utility. In particular the Woodsy Wagon pushcart and the Permatent with its outside kitchen and shower. These plans drawn up by Deek and others conjure up the spirit of the tiny house community in terms of a larger movement. But this is the book that really makes me want to get up and build something for the pure joy of it. Deek shows me in his colorful photos of every detail of these micro shelters and in his layman's terms (and plenty of made up ones too), how easily it can be done.
