MOTHERS OF INVENTION: FROM THE BRA TO THE BOMB : FORGOTTEN WOMEN AND THEIR UNFORGETTABLE IDEAS BY ETHLIE ANN VARE, GREG PTACEK PDF

Mothers Of Invention: From The Bra To The Bomb : Forgotten Women And Their Unforgettable Ideas By Ethlie Ann Vare, Greg Ptacek. A work could obligate you to constantly enhance the knowledge and also encounter. When you have no enough time to improve it straight, you can get the encounter and also expertise from reviewing the book. As everybody knows, book Mothers Of Invention: From The Bra To The Bomb : Forgotten Women And Their Unforgettable Ideas By Ethlie Ann Vare, Greg Ptacek is popular as the window to open the world. It means that reviewing publication Mothers Of Invention: From The Bra To The Bomb : Forgotten Women And Their Unforgettable Ideas By Ethlie Ann Vare, Greg Ptacek will certainly give you a new method to discover every little thing that you require. As the book that we will offer below, Mothers Of Invention: From The Bra To The Bomb : Forgotten Women And Their Unforgettable Ideas By Ethlie Ann Vare, Greg Ptacek

From Publishers Weekly

After centuries of oversight, several unheralded female inventors are here chronicled by Vare (freelance journalist/biographer) and Ptacek (former editor of Rock magazine). Over 100 brief biographies sketch the conditions prompting certain discoveries: for example, serendipity factored in the creation of toll-house cookies. The specter of scandal pervades this collection as, for one, Eli Whitney is exposed for defrauding Catherine Littlefield Greene of fame and fortune as designer of the cotton gin. Other inspirational accounts range from the development of household gadgets (Margaret Knight's brown paper bags), to industrial and scientific discoveries (Lise Meitner's theory of nuclear fission). This "herstory" refutes the historical contention that the abstract ". . . is not the province of women." Three appendixes provide additional information about patents. Photos not seen by PW.

From School Library Journal

YA "How different would the world be without. . .the chocolate chip cookie? . . .the discovery of nuclear fission?" With a catchy title and the fascination of invention built-in, this is the sort of volume that YAs will pick up, flip through, and find engrossing. Women inventors, both serious and frivolous, are laudedthe authors' theme is to give credit to women whose creative talents have been unknown or largely ignored. A mix of professional and humorous achievements with drawings, diagrams, and photographs (including one of a damsel in a corset who later died of asphyxiation) make the book journalistically intriguing. Further encouragement to future inventors is found in the foreword as well as in final appendix, which provides the address of the U.S. Patent Office and directions on how to file for a patent. Although it is not a book to be read cover to cover, amusement and feminist views aside, it would certainly provide lesser-known biographical material and be a source for unusual science facts. Jenni Elliot, Episcopal High School, Bellaire

From Library Journal

This fascinating volume will find a place in the browsing sections of both adult and YA collections. As the authors point out, most publications about inventors and inventions are all-male in their scope. Although all periods are covered, most of the entries are for 20th-century women, e.g., Helena Rubinstein, Marie Curie, and Rosalyn Yalow. Brief biographical information is given along with a chatty description of the invention. "Unsung heroines" are those whose ideas were stolen or appropriated by more prominent men. Appendixes include how to get a patent. Recommended. Paula M. Zieselman, formerly with Sarah Lawrence Coll. Lib., Bronxville, N.Y.

A must have book for all libraries

By Alan Reed

This book is an excellent source of information about the contribution women have made to our society. As a Middle School science teacher, I find that most of my students assume that inventions are made by only men. They are amazed to learn that women have invented many things, and many of the things we use on a daily basis. I use this book so much that my copy needs to be replaced.

An Inspiration for all women with an idea!

By Meredith Day

This book is an inspiration to anyone. A kick in the butt to women who are surrounded by un-empower-ers and naysayers who are determined to convince you how stupid your ideas are. The book tells you it's ok to have ideas and it's ok to have to try a few times to get the wing nuts tight. I recommend this book as a guide to anyone who wants to step out of the comfort zone and change the world!!! I credit Ethlie Ann Vare with giving me the inspiration to make music, write scripts and books and patent cameras and re create myself as a cyber rock star at 60 years old! I encourage anyone who has stepped out and accomplished something extraordinary to make sure Ethlie Ann Vare hears about it! Meredith Day/Wowzer 3D Animation Camera/"Rock Me" Cd/"Lost Inside The Mirrors" Album/Meredith Day Photography. Thank you Ethlie Ann Vare, I am honored to be mentioned in your book! And you walk the talk!

Great for research!

By Megan Walters

This book really helped me with a history term paper. It has very comprehensive information about women inventors who have been forgotten. I was amazed to see how far back it went with it's women inventors. A very useful and interesting book. I would reccomend it highly for both research and pleasure.
