I don't recommend this book as I find it rather disappointing for my expectations. I got it to help prepare for OCM-EJA-6. The questions are no where near the real exam quality. I took the real exam and passed but it was much more difficult compared to what has been reflected in this book. What I find is, some questions are derived from a sentence from a JSR (usually from the first few pages), some corresponds to exact wording in

Mark Cade and Humphrey Sheil book (Chapter 2) and so on.

The answers are often can be guessed because of the wording, some questions are wrong as their answers are answering the opposite of what the question asks (i.e. advantages is asked and disadvantages was the correct choice in answer) and there are grammar errors which makes the book look like it has not been reviewed before publishing.

I find the assignment part very weak. It has way less details compared to Mark Cade and Humphrey Sheil book.

In my opinion this book does not reflect the real exam so, be keep in mind if you decide to buy.

The book is ok meets its objectives, I would recommend giving the answers more explanation and not repeat them and leave the explanation as short.
