A Comprehensive Guide to Fish of the Tropical Pacific
By Waynemia

I have a number of Paul Humann Reef Fish identification books. They are very detailed and provide help on fish identification. Although there is extensive information, don't expect every fish to be represented. Also, many fish are very similar or differ from juvenile to adult. You also need to pay attention to the range for the fish in the pictures. You may think you have just found a rare fish when in fact, it does not inhabit the area where you are.

All the details of how to use the book are in there so take time to see how to best use this excellent reference.

I recently used this book for my dives on the Great Barrier reef and Coral Sea.
