Tips From This Kindle Book About Overcoming Procrastination

4. Clean Your Surroundings

Where you live and everything around you can encourage procrastination, whether you like it or not. This is because your desk, your workplace and everywhere you frequent speaks a lot about you. If these areas are cluttered, dirty or messy, there's a huge chance that you won't want to work.

Therefore, take the time to clean up the whole mess and throw away the things that you can't use or don't need. Create a clean and peaceful working environment which encourages creativity and positive thinking.

5. Take Baby Steps

Hard work and avoiding procrastination starts with you and your commitment to finishing something.

For starters, in the first 20 minutes after waking up in the morning, there's a voice telling you that you should go back to sleep. Sure, sleep is good, but it's not always something that you need. This is even more true if it's 4 or 5 in the morning, which is the perfect time to go jogging for an hour or two.

Don't give in to that voice. Shout if you can. Tell yourself that you're going to commit to your goal. Don't just stare idly at the clock and wait for time to go by.

COMMIT COMMIT COMMIT COMMIT COMMIT. And mean it. Commit to yourself and commit to what

you want to happen. Eventually, it will become second nature to you.

6. Find Someone to Help You Out

Choose a person that you're close with. They can be your spouse, your partner, a friend, someone you look up to or even a life coach if you can afford it. Ask them kindly if they can help you hold yourself accountable, but in a friendly and non-bossy way.

This way, someone can remind you to wake up early in the morning and go jogging or do whatever it is you want to commit yourself to.

Another great idea is to ask for help from someone who needs encouragement too. Think of it as a gym partner of sorts, who you can help spot to make your life at the gym easier.

Remember, two heads are better than one.

Every had procrastinated every once and while. I know that when a few huge deadline were coming up I would find myself surfing the internet or finding something new to bake instead of doing my work. Stop procrastinating today!

By mint tea

This is a book that will help pretty much anyone learn how to stop procrastinating. It explains how no one is immune to procrastination and offers facts on what exactly procrastination entails. It also explains some reasons why people procrastinate, as well as reasons why you shouldn't. Then there is what I thought of as a checklist of reasons to go through to find out why you personally procrastinate and ways to change the behavior, so you can nip it in the bud. Some of these items include figuring out why you are procrastinating, cleaning up your surroundings, not making excuses, taking baby steps to complete your goals, and rewarding yourself when you complete something. This book taught me a couple things and I think it would be an excellent read for anyone that wants to complete a major goal, or anyone that has problems with procrastination and would like to change it.
